- Supports Immune System Function & Immune Cell Response\*
- Promotes Heart Health, Brain Function, Bone & Muscle Strength, and More\*
- 5,000 IU of Vitamin D3 plus Zinc, Quercetin, Vitamin K2, and Key Co-Factors

## Are YOU Getting Enough Vitamin D?

**Tens of millions of Americans are low in Vitamin D!** Consensus is growing among nutritional advisors that the recommended daily intake for Vitamin D is outdated and too low. A study published in *Nutrients* (August 2014) discovered we require much more Vitamin D than previously recommended. To help support healthy blood levels of Vitamin D, **Purity's Advanced D™ Formula** provides **5,000 IU of Vitamin D3** - plus key co-factors - promoting healthy Vitamin D assimilation.

## Why is Advanced D™ so Special?

Purity's Advanced D™ provides a powerful dose of cholecalciferol (Vitamin D3) backed by nutrients that work in tandem with this crucial vitamin to support numerous systems within the body including your **bones, muscles, brain, immune system, energy and metabolic function.**\*

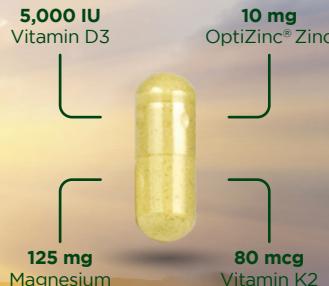

## Enhanced with Key Co-Factors

Purity's Advanced D™ includes a blend of nutrients (key co-factors) that help Vitamin D fulfill its potential. These include Magnesium, Zinc, Boron, and Vitamin K2.

- **Zinc** plays a role in the Vitamin D receptor and Boron supports Vitamin D metabolism.\*
- **Vitamin K2** has been shown in human research to have synergy with Vitamin D, combining to support bone health and cardiovascular wellness.\* We use both MK-4 and MenaQ7® - high performance forms of Vitamin K.

# H.A. Joint™ Formula: Discover the Molecule of Youth™

- Supports Healthy Joints\*
- Supports Reduced Oxidative Stress on Joint Tissues\*
- Promotes Normal Shock-Absorbing Capacity of Joints\*

## Why is H.A. so Important?

Ideal for adults who want to stay active, and touted as "The Molecule of Youth™," H.A. (Hyaluronic Acid) is used by millions of people in Japan, Europe and now North America. Found throughout the body, H.A. is a **fundamental part** of the structural matrix that keeps all of our organs and tissues intact.

Connective tissue — the scaffolding molecule or "glue" that holds our bodily structures together — is rich in Hyaluronic Acid. Joint cartilage is made of connective tissue, which is why H.A. is so critically important to healthy joints.\*

Unfortunately, our own body's levels of H.A. **decline as we age...**

## Beyond Joints - the H.A. "Beauty Factor"

Hyaluronic acid is an **essential component of skin** that keeps it healthy, hydrated and youthful looking. A recent clinical trial showed that after just 12 weeks of oral supplementation with 1,000 mg of BioCell Collagen® containing H.A., improvements were seen in signs of facial aging such as wrinkling and lines, as well as the **collagen content** of the dermal skin layer.\*
